2nd world CONGRESS OF THERMAL MEDICINE ACADEMY

President's message of Hellenic Thermal Medicine Academy

Dear colleagues and participants,
I honorarily invite you to the 2nd World Congress of Thermal Medicine which will be held 08-10 October 2021 at the Hotel Galini, Kamena Vourla. In this Congress will participate outstanding colleagues, as well as internationally well-established personalities who will present all the scientific up to date information and evolutions in the Thermal Medicine while at the same time lectures, workshops and round table discussions will take place.

The 2nd World Congress of Thermal

Medicine in cooperation with the European University of Cyprus will be co-organized also with the Regional Governor of Attica Mr G. Patoulis, the Regional Governor of Central Greece, Mr T. Spanos, the Cultural Development Organization of Central Greece and the Hellenic Academy of Thermal Medicine. The Hellenic Academy of Thermal Medicine was founded in 2015, aiming to establish and update Thermal Medicine as a complementary therapeutic method, with scientific documentation of its medical applications. Promising signs

for Greece are the legal and institutional framework, as well as the decision of Plenary Session of Central Health Council in 2018 to establish Complementary Medicine integrating the Thermal Medicine. The on-going approval of prescriptions from National Organization of Health Services has confirmatory role for the effects of the complementary Thermal Medicine's therapies.

Thermal Medicine, with the scientific documentation supports the thermal, mechanical, chemical and particularly biological and immunological effects of

The Contribution of Thermal Medicine TO PUBLIC HEALTH

the healing natural resources and has emerged as a complementary therapeutic method to the Classical Medicine. From ancient time health, wellness, power and beauty are among the most precious goods of life, particularly in ancient Greece, the care of physical, mental and spiritual health was an important part of Greek culture, according to Hippocrates, Father of Medicine, who founded the principles of Thermal Medicine.

The therapeutic methods of Thermal Medicine are: external hydrotherapy (balneotherapy), drinking therapy, inhalation therapy, clay therapy, salt therapy, thalassotherapy, cave therapy and biometeorological therapy. Thermal Medicine updated from the empirical state to the scientific one with evidence studies (evidence based medicine) in Greece beginning 2006, has therapeutic actions in different diseases of myoskeletal, neurological, respiratory, cardiovascular, hematopoietic gastroenterological, urological and endocrine system as well as in dermatological, gynecological, allergic and otorhinolaryngologic ailments.

Therapeutic applications of Thermal Medicine in the various specialties are applied based on research, medical studies, doctoral theses and scientific

papers. Medicine helps eventually not only the treatment, recovery and rehabilitation of physical, mental and spiritual health, but also helps the treatment of silver & golden age, by applying longevity and well-being standards, as a preventive method.

This effort reflects the current situation in Greece that aspires for our country to become a global health resort medspa not only for the elderly and patients with chronic diseases but also as Preventive Medicine, under the medical supervision, always by experienced and internationally acclaimed physicians. Our basic aim is to stop the «brain-rain» and develop the «brain-regain», as the interest is growing internationally since the patients are looking for upgraded medical treatment, recovery, rehabilitation, antiaging and wellness services. Substantial role plays the establishment of a Master Degree Program specialized in Thermal Medicine in the Medical School of Athens, as well as a similar e-learning program. This effort has the ultimate goal of integrating Thermal Medicine as an elective course in undergraduate medical students' education and additionally as thermal medical education in postgraduate programs related to different specializations.

The financial evaluation of the establishment and promotion of Greece as Health Tourism well-ness destination, especially for older people in combination with all thematic forms of tourism (clusters) inducing high added values and new jobs.

Determinant is the contribution of Attica Regional Governor President AMA, G.H.D.I, IHTC, ELITOUR and Founding Member of the Hellenic Academy of Thermal Medicine G. Patoulis, in promoting and establishing internationally the Thermal Medicine. He with his inspirational energy created the Global Hippocrates Institute of Doctor's, formulating national policy for the revival of Hippocratic spirit establishing Greece to be prominent not only as therapeutic but at the same time as educational center of Hippocratic Medicine and Classical Medicine with holistic approach.

Yours sincerely,

Kouskoukis Konstantinos

Professor of Dermatology -Lawyer-
President of Hellenic Thermal Medicine
